☐ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 8.01 Other Events.

On April 9, 2015, Evoke Pharma, Inc. (the "Company") announced that the European Patent Office has granted European Union patent no. 2376075 for the Company's lead product candidate, EVK-001. This patent is related to formulations used in EVK-001, the Company's intranasal delivery formulation of metoclopramide for the treatment of symptoms related to diabetic gastroparesis in women, and is expected to offer protection through December 22, 2029.

EVK-001, currently in a Phase 3 clinical trial, is a novel treatment for gastroparesis, which is a disease that can hinder the absorption of oral medications due to symptoms including erratic gastric emptying, as well as nausea and vomiting. The Company's intranasal formulation is designed to provide reliable and predictable delivery of metoclopramide, the only drug approved by the U.S. Food and Drug Administration ("FDA") to treat symptoms associated with gastroparesis, through absorption directly into the blood stream, enabling the drug to avoid a patient's impaired stomach.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

EVOKE PHARMA, INC.
